

## **EFFSO strengthens its specialist expertise in procurement and supply chain – welcomes two new key appointments**

**Stockholm, 9 March 2026: With continued strong demand for qualified procurement and supply chain expertise, EFFSO is strengthening its operations by welcoming John Gunnarsson and Andreas Hansson. The appointments will further develop both the company’s interim services and its consulting offering.**

John Gunnarsson has a broad background in procurement, sourcing and supply chain and assumes the role of Consulting Manager at EFFSO in Stockholm. He most recently comes from One Academy AB, where, as co-owner, he helped build and develop their higher vocational education programs in procurement and sourcing. In this role, he worked closely with both procurement professionals and procurement leaders across the private and public sectors, focusing on talent supply within procurement. His work has included training initiatives, consulting solutions and recruitment of qualified procurement professionals based on specific organizational needs.

“John has already become an important part of the team. With his solid background in procurement, strong drive and expertise in talent supply, he contributes both direction and energy. His straightforward and genuine approach strengthens the team spirit, and I look forward to how his experience and network will contribute to EFFSO’s continued development,” says Anna Hedre Eidhagen, Head of Recruitment and Interim at EFFSO.

Andreas Hansson has extensive experience in procurement and supply chain in both consulting and line management roles. He returns to EFFSO as a Senior Management Consultant after eight years at Hitachi Energy HVDC, where he held several senior leadership positions – most recently as Global Head of Supply Chain with responsibility for the entire value chain during a period of significant international growth. Andreas previously worked at EFFSO for six years and has substantial experience in leading international client projects as well as developing procurement organizations and capabilities.

“Andreas brings a unique combination of strategic perspective and operational experience from complex and international environments. His background in global supply chain leadership and organizational development strengthens our ability to support clients in larger transformation and growth journeys. We are very pleased to welcome him back,” says Arsalan Motavaf, Head of Management Consulting at EFFSO.
